Special Provisions

3. Prosecution and Progress

Insert the following paragraph after the fifth paragraph:

Prioritize clearing and grubbing operations between STA 304+00 and 311+00 RT during the 2022 construction year. Coordinate the anticipated timeframe for completion of the clearing and grubbing operations within this station range with the Alliant Energy field contact listed in the plans. Alliant Energy is expected to complete their facility relocations in this area immediately following clearing and grubbing operations. Proceed with excavation activities in this section only after Alliant Energy has completed their facility relocations, which are anticipated to take 10 days.

6. Utilities

Replace paragraph five under section titled Alliant Energy – Electricity with the following:

There are overhead facilities along the west side of existing STH 69 approximately from Station 302+00 to Station 459+00. Alliant Energy will relocate this facility to new poles inside the proposed west right-of-way. There will be overhead crossings at Stations 304+00, 333+00, 350+70, 354+50, 395+10, 407+40, 426+80, 445+50, 459+00. There will be an underground crossing at Station 337+40.

Replace the last paragraph under section titled TDS Telecom - Communications with the following:

This work is anticipated to begin on 01/27/2022 and take 75 working days.
